**Project Reflections**

In D2L 'Content', there is a new folder labeled, "Class Projects".

Browse through the files, representing term projects submitted by this class, and then answer the following questions.

Your responses will be uploaded to the corresponding assignment folder in D2L. Follow normal assignment criteria, with one exception: there is a 2-page maximum for this assignment. (That doesn't mean that it has to be 2 pages long! Just giving you some latitude!) **DO NOT INCLUDE THE QUESTIONS: JUST YOUR ANSWERS.**

**PLEASE! Use the question numbers as labeled below!!**

**Reflection Questions:**

1. From your classmates' projects (that is, not including your own!), select one place (only one!) that (before you looked through these files) you had no idea existed, or knew nothing about it, but it now interests you in some way.
   a. Give the name and location of this site.
   b. Briefly tell what it is about this place that caught your attention: why, specifically, does this location interest you?
   c. Do you think you would try to visit this place someday? Explain or tell more (not just a yes or no question!).

2. Other than your answer to #1, but still from your classmates' (not yours!) projects, select TWO locations that you really would like to visit someday.
   a. Give the name and location for the first location that you choose; and:
      1. Briefly describe your reasons for wanting to visit this location.
      2. Did this classmate's presentation influence your level of interest in visiting this location? Explain.
      3. Briefly describe ONE interesting geologic fact about this location that you learned from the presentation.
   b. Using the same numbering and questions (as for 'a'), respond about the second location of your choice.

3. Describe your overall reactions to this project:
   a. Regarding your own project site:
      - What aspect of doing this project was the most interesting?
      - What was the most frustrating (or least interesting) aspect?
      - Name one interesting or surprising fact that you learned about your project site.
      - Do you think you will try to visit here someday? Explain (not just "yes" or "no"), including how doing your project influenced your level of interest.
   b. What is your overall reaction to viewing all of your classmates' projects?
      - How do these projects affect your perspective about "geology in the world around us"? Explain.
      - How did these projects affect the way you think about traveling and/or about other parts of this country? Explain.
